

## Harnesses and Leashes

International scientific literature inspired Haqihana to propose a substitute to the collar, which is often a painful source of physical and psychological problems for the dog. We present a **“non-inhibitive”** type of harness which is easy to put on, comfortable for the dog and stylish.

A new harness line is now available, characterized by the high level of its **design**, focusing mainly on the **comfort** of the dog, the **quality** of the materials and the **precision** in production. The line offers a good choice of colours and they can be coordinated with the leashes.

Wearability means the feeling an item of clothing is a perfect-fit, giving smartness and comfort which, together with the ease and **natural fitting**, ensures acceptability for the dog who will be happy to wear something comfortable that does not irritate and is not painful in any situation.

## Characteristics

The use of high quality materials, **all produced in Europe**, satisfies non-toxic, anallergic and recyclable requirements, making the finished product resistant and enabling us to give our clients a 5-year manufacturer's guarantee.

Our standards for detail in **handcraft manufacturing**, which takes place on our premises by technically qualified personnel, gives us the desired quality and capability for **continued improvement** of the product.

Design, together with well-proportioned dimensions and the positioning of the harness on the dog have been carefully studied to guarantee maximum comfort in all situations. Pressure is properly distributed on the dog's sternum and thorax only, even when the dog is pulling, jerking or being restrained. The harness does not cause pain, sense of restriction, friction or injury to the skin, and does not limit movement or create other discomfort. The two buckles and their position make putting on and removing the harness trouble-free for dog and owner.

### Webbing

The webbing is made of high tenacity, **spun-dyed nylon-6** which guarantees colour homogeneity and resistance. The special characteristics of nylon (polyamide) make it particularly suitable for harness and leash production. In fact, amongst synthetic fibers, nylon is well-known for its softness, optimal strength-to-weight ratio, abrasion resistance, and chemical and biological stability. Finally, it is fully recyclable. The webbing is made in Italy to our design.

Manufacture

The Plastic Components

The Plastic Components

Sizes and Adjustability

D-Ring

### Manufacture

The harnesses are **hand-made** paying great attention to detail. In fact safety and comfort for the dog are very important. All parts are sewn together with **secure stitching** and the overlapping parts, which have contact with the skin, are finished with a **special stitching** to avoid any rubbing, particularly in the short-haired dog.

### The Plastic Components

The buckles and adjusters are made of acetal resin which maintains **long-lasting** mechanical and shock resistance even in extreme conditions. The plastic parts are rounded off and have **no sharp edges** in order to ensure the dog's comfort.

### Sizes and Adjustability

The carefully studied sizes and the **five point regulation** guarantees optimal wearability and adaptability of the harness for all dog sizes and morphology.

### D-Ring

The metal components are in **stainless steel** (Inox 304) which does not release Nickel or cause allergic reactions in accordance with European regulations.

Leash

Leashes

### Leashes

The webbing is **available in the same colours as the harnesses** in 15 or 20mm width and 2 or 3 meter length. The small snap-hook on the loop handle can be used for making the leash half the length.

**They are light and suitable for leisure walks**; their length gives the dog the freedom to move around even when the use of the leash is mandatory. Haqihana leashes may not be suitable for exuberant dogs that jerk the leash.

### Guarantee

All products have a manufacturer's guarantee.

#### Guarantee duration

The guarantee covers the harnesses and leashes for **5 years from purchase** date – with repair or replacement – against all faults, breakage or that which is not considered normal wear and tear. Haqihana reserves the right to verify the correct use of the harnesses and leashes. For example chewing (of the harnesses or leashes) or failing to follow washing instructions is not considered correct usage.

#### Repairs

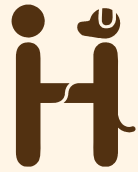

Haqihana also provides a repair service for a fee in all other cases where the repair is technically possible.

## Harness sizes

Code (col = colour)	Size	Webbing		Girth				Breed
				Ø cm		Ø inches		
		mm	inch	min	max	min	max	
HRS_XL_col	XL	25	1	90	130	36	52	St. Bernard, Great Dane, Leonberger, Newfoundland
HRS_L_col	L	25	1	70	100	28	40	Weimaraner, Rottweiler, Dobermann, German Shepherd
HRS_M_col	M	25	1	60	80	24	32	Golden Retriever, Setter, Boxer, Labrador
